

Frank Goulding Ltd were engaged by the Little Company of Mary for the design and build of a very bespoke project to develop a Heritage Centre and living accommodation.

Frank Goulding Ltd project managed the work. The project was a major refurbishment of the interior and exterior of a 4 storey house. The house was completely stripped back, all services were re installed. A lift was installed to service the 4 floors. There were significant special requirements because of the bespoke nature of the project.

From the outset of the process we felt extremely confident with Aidan Goulding of Frank Goulding Ltd. He took a great interest in the project, attending regular meetings with all parties involved. He was always available to us for guidance and advice especially as the administration of our organisation was based in London and the project in Nottingham. He was consistently professional, approachable, courteous, helpful with good ideas and nothing was too much trouble. The Company oversaw the final fit-out following the construction.

The operatives employed by Frank Goulding Ltd were equally helpful, courteous and their work was of a very high standard.

In summary we were very pleased with the quality of the service provided and delighted with the end product. The company were professional and helpful during the whole process and we would use the company again should we need work on any other projects.
