

To whom it may concern 4/2/2013

We have just had completed three extensions to our family home, which were planned and executed by the team at Frank Goulding Ltd.

We chose FGL to plan, manage and build our extensions because we were aware that they had a very sound and favourable reputation as professional builders, in this area.

Despite taking over our family home for nigh on 8 months, during which they built, knocked through, re-built, tiled, plastered, added electrical cables, altered the heating system and added changes as we desired, the whole team, never failed to be polite, considerate and accommodating throughout the project.

We did not move out of our home during any of the renovation, but FGL managed to keep our cooker, washing machine and dishwasher fully functioning throughout. On most occasions they would clear and clean the area they had been working in to allow near normal living to continue.

Although there where several stressful moments, the team and Aidan and Ross in particular, worked hard to ensure that the stresses were minimised and ultimately overcome.

Thanks to the professionalism of the whole team (and the team sometimes numbered over 10 people around the house at one time) we now have a home that we a very pleased with and that meets all of our original expectations and dreams.

We would not hesitate to recommend FGL to plan and complete any building project, large or small.

Just make sure you have plenty of tea and coffee to hand.
